Dear Ken,

It has recently come to my attention that construction activity at the site at the corner of Esterbrook Road and Great Road has ceased. Although you have provided suitable replacement trees and a cash donation to the Town for the trees that were removed, there is at least one detail that remains to be attended to.

Specifically, there are at least two stumps that are within the right of way, at the edge of the pavement: these stumps are raised several inches above grade, and present a serious potential road hazard, especially this winter when they could present a hazard to snow plows.

Please see to it that these stumps are ground out below grade as soon as possible. If you have any questions, please feel free to call.

Sincerely,

Dean A. Charter
Municipal Properties Director

NOTICE OF INSPECTION

TO: Federal Investment Trust

SUBJECT: PERMIT TO CONSTRUCT WITHIN A PUBLIC WAY # 90-29

LOCATION: 157 Great Road

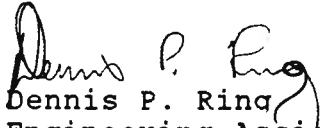

DATE: August 28, 1991

THE FOLLOWING WORK REMAINS TO BE DONE:

During the construction at the Great Road site, several trees were removed from the Town right-of-way on Esterbrook Road. It is my understanding that replacement trees have been provided, however, the stumps from the former trees still remain. The highway superintendent has expressed some concern that the close proximity of the stumps to the edge of the travelled way on Esterbrook Road may create a potential hazard to snow plowing this winter.

Dean Charter, Municipal Properties Director, has notified your site contractor of this matter. Thus far, no action has been taken to remove the stumps. Please be advised that the work described above is covered by your Permit to Construct Within a Public Way. If this problem is not addressed soon, all or a portion of the performance deposit that you posted may be used by the Town to rectify the situation. Please make arrangements with your site contractor to remove the stumps as soon as possible.

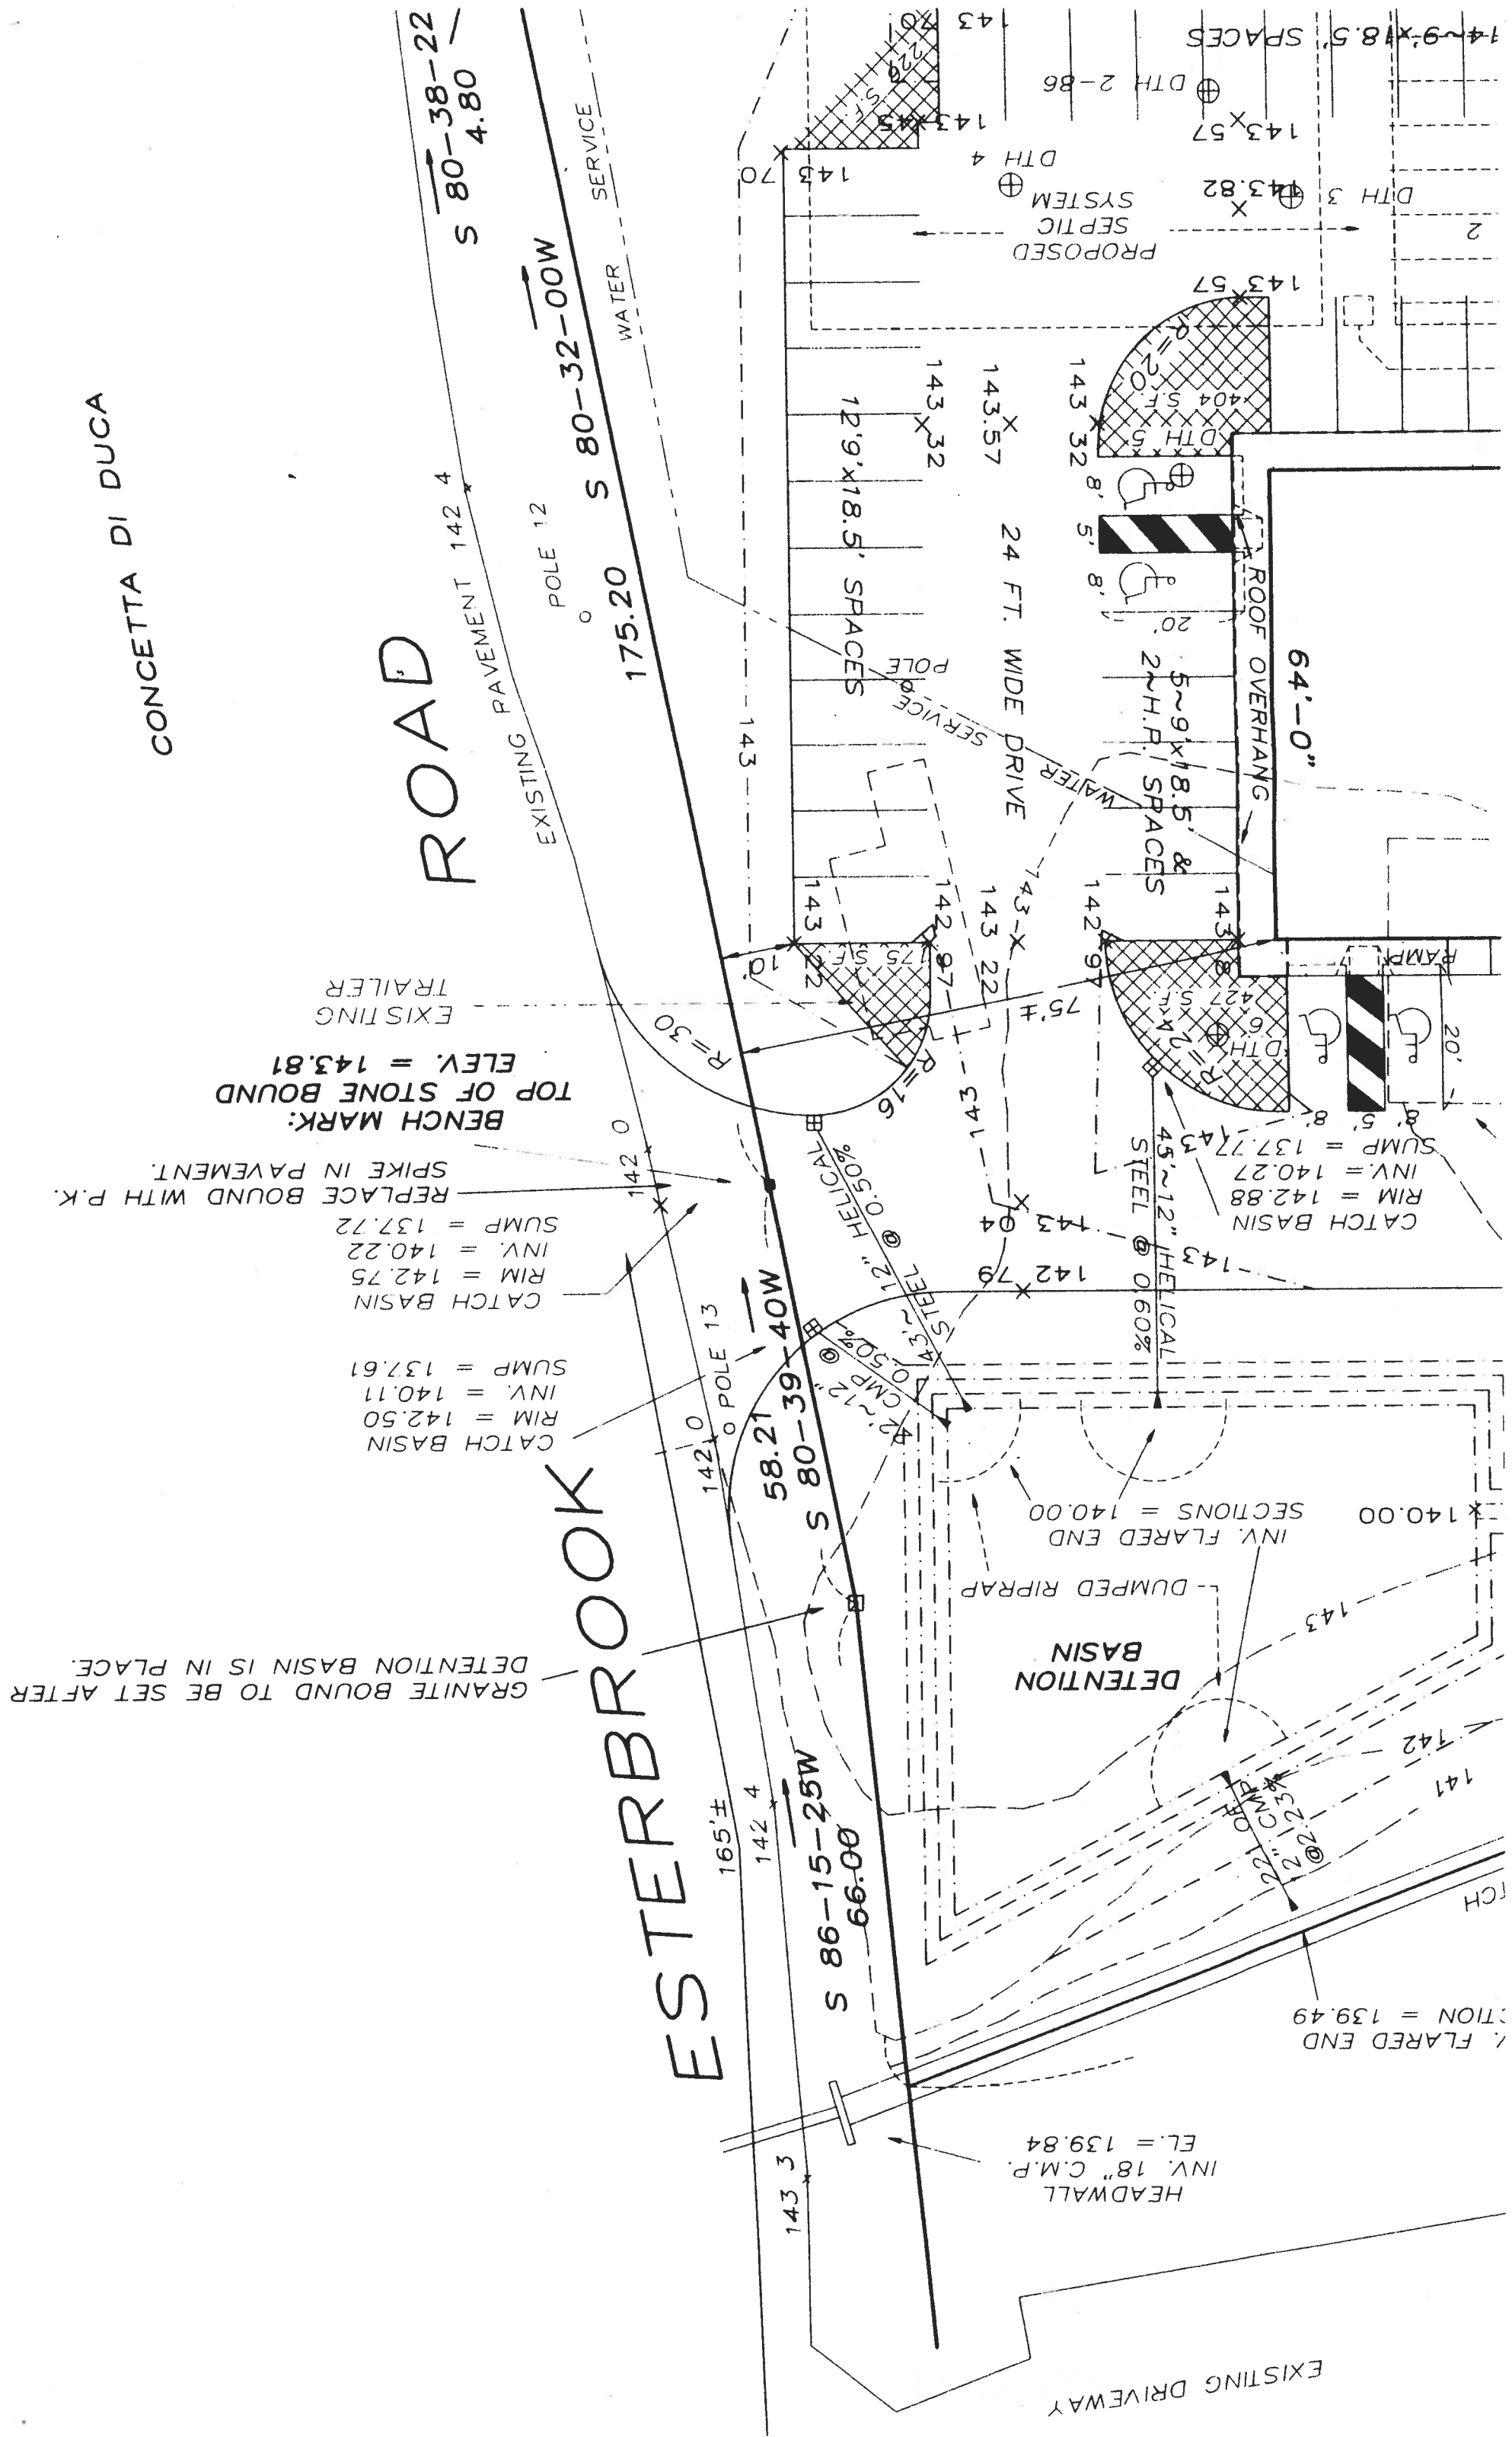

If you have any questions regarding this matter, please feel free to contact me at 264-9628.
